

THE SMART SYSTEM FOR RUNNING A DENTAL CLINIC

Why *Dr. Dental IQ*?

One system for the whole clinic: from the patient's first WhatsApp message to the invoice, the clinical file, smart radiology and the manager's report — in Kurdish, Arabic, Persian and English, on a computer, a tablet and a phone.

Address Erbil, Kurdistan Region of Iraq

PATIENTS FIND YOU

Be found, get booked, stay in touch

Today a patient searches first and then writes on WhatsApp. These four parts build that same road to your clinic.

1

Your own clinic page, and being found in search

Every clinic gets its own address (drdentaliq.com/c/clinic-name) with its name and logo, services, opening hours and an "open now" badge, directions on the map, call and WhatsApp buttons, a link to review you on Google, and your social accounts. The page is ready for search engines (structured data for a dental clinic) and is listed in search results for clinics with an active subscription that have written about themselves.

4 languages

Mobile-friendly

No coding

2

The patient portal

Patients see their own file: visits, treatments, invoices and prescriptions. They sign in with their mobile number and a code that arrives on WhatsApp — no password. The clinic hands out the link or a QR card; a poster and a printed card are ready.

WhatsApp code sign-in

Poster and QR card

3

Booking on WhatsApp

The patient writes "book"; the assistant offers the dentist, the service and the free times, and answers in the patient's own language. Cancelling and moving a visit work from the same chat. You choose automatic or manual confirmation, and the front desk is told at once. If nothing is free, the patient joins the waiting list and is messaged when a visit is cancelled.

Cancel and move

Waiting list

Instant alert to the desk

4

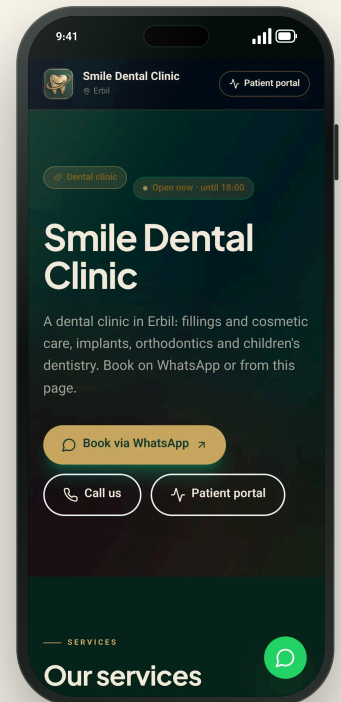

Notifications and reminders

A reminder before the visit, a recall for the regular check-up, a request for a review after the visit and after-care instructions — all on WhatsApp, each with its own switch. Email too: welcome and first access, renewal reminder, payment confirmation and a backup copy. And a live alert inside the system for every new visit.

THE DENTIST WORKS FASTER AND MORE PRECISELY

Clinical file, imaging and AI

Everything the dentist needs at the chair is in one file, and the system takes the repetitive work.

The tooth chart in a patient's file (a real screen of the system)

1 A near-3D visual tooth chart

Teeth are numbered the FDI way and drawn realistically, and recording a condition (decay, crown, implant...) changes the picture of the tooth itself. Tap any tooth: its condition, the surfaces involved, notes and history.

2 Before and after photos for every treatment

For each tooth of each patient you upload a "before" and an "after" photo; they stay beside the history and notes – for follow-up and for showing the patient the result.

3 Smart radiology

Upload the radiograph; AI analysis suggests findings with tooth numbers. The dentist confirms or rejects each one, and only confirmed findings reach the chart, the draft treatment plan and the patient's PDF report. DICOM and CBCT open inside the system. (A diagnostic aid – it does not replace the dentist's judgement.)

FDI

PDF report

DICOM / CBCT

4 Smart assistant

The list of upcoming visits with a no-show risk level (high, medium, low) and a call or WhatsApp button beside each patient, and a radiograph assistant that suggests a checklist by tooth number.

5 From treatment plan to consent

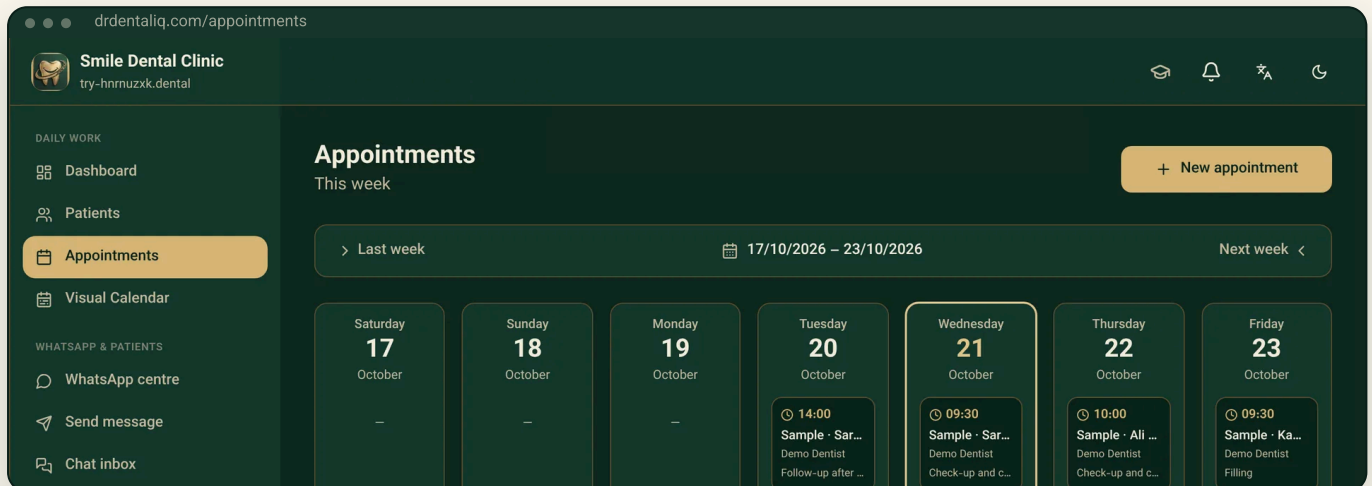

Multi-visit treatment plans with instalments, prescriptions, digital consent signed on a tablet, implant records (brand, diameter, length, serial number), and a ready package for oral and maxillofacial surgery.

— AN ORDERLY CLINIC WITH A PROFESSIONAL IDENTITY

Management, money and security

Every sheet that leaves the clinic carries your identity, and every dinar and every change can be traced.

The week's appointments at a glance (a real screen of the system)

1

Your logo, header and footer, in your own words

Upload the logo and write the header and footer in all four languages; they appear on every invoice, receipt, prescription, treatment plan and printed patient file, and on the clinic's public page.

2

Invoices, instalments and several currencies

Invoices and receipts, instalments with reminders, and work in dinar, dollar and rial; each currency is totalled on its own and never added to another. The cash book and daily close, expenses and financial reports.

3

A network of dental labs

Send an order to the lab with an STL file, follow its status to delivery and get a monthly statement — both sides (clinic and lab) see the same information. A lab can also register itself.

4

Stock, reports and decisions

Stock levels with low-stock alerts, a management dashboard, a report on each dentist's work, staff attendance and leave, rooms, a dentist's leave (no bookings are given) and where patients heard of you.

5

Access, security and backup

Separate roles and access for manager, dentist, receptionist, accountant and assistant; an activity log (who changed what); two-step sign-in; an automatic backup every night on the server and a copy sent to your email; and export of your data whenever you want it.

THE FULL LIST

Every feature at a glance

What works in the system today – with no promise of anything not yet built.

Being found and in touch with patients

- ✓ Your own clinic page at your own address
- ✓ "Open now" badge and opening hours
- ✓ Patient portal: visits, treatments, invoices, prescriptions
- ✓ Book a visit on WhatsApp (assistant)
- ✓ Waiting list and an automatic message when a slot frees up
- ✓ Recall for the regular check-up
- ✓ After-care instructions, printable and sendable
- ✓ Poster and QR card for the front desk
- ✓ Listed in search results (with an active subscription)
- ✓ Directions on the map and a call button
- ✓ Patient signs in with a WhatsApp code, no password
- ✓ Cancel and move a visit on WhatsApp
- ✓ Visit reminder before the appointment
- ✓ Review request and Google review link
- ✓ WhatsApp chat inbox and a log of every message
- ✓ Email notifications to the clinic manager

Clinical file and imaging

- ✓ Near-3D visual tooth chart (FDI)
- ✓ Before and after photos for each tooth
- ✓ Multi-visit treatment plan with instalments
- ✓ Digital consent signed on a tablet
- ✓ Smart radiology with FDI numbering
- ✓ PDF report for the patient
- ✓ Smart assistant: no-show risk prediction
- ✓ Insurance: record and follow claims
- ✓ Record each tooth's condition: decay, crown, implant...
- ✓ Notes and history for each tooth
- ✓ Prescriptions, with printing
- ✓ Implant record: brand, diameter, length, serial
- ✓ The dentist confirms or rejects each finding
- ✓ DICOM and CBCT viewing inside the system
- ✓ Oral and maxillofacial surgery package with ready consents

Management, money and security

- ✓ Your own logo, header and footer (4 languages)
- ✓ Several currencies: dinar, dollar, rial – each on its own
- ✓ Expenses and financial reports
- ✓ Reports, management dashboard and dentist performance
- ✓ Rooms and dentist leave (no bookings given)
- ✓ Where patients heard of you
- ✓ Activity log: who changed what
- ✓ Automatic nightly backup and a copy to your email
- ✓ Invoices, receipts and instalments
- ✓ Cash book and daily cash close
- ✓ Stock with low-stock alerts
- ✓ Lab network: orders with STL and delivery tracking
- ✓ Staff attendance and leave
- ✓ Roles and access for every user
- ✓ Two-step sign-in
- ✓ Export your data whenever you want

TRAINING BUILT IN, FOR EVERY MEMBER OF THE TEAM

Every role has its own training

Manager

Dentist

Receptionist

Accountant

Assistant

Lab

Patient

- ✓ 29 short video lessons (under a minute) for each role's daily tasks, in **Arabic and Sorani Kurdish**, with subtitles on screen.
- ✓ A 36-chapter written guide in Kurdish, Arabic, Persian and English, with real screenshots of the system and "what not to do" notes.
- ✓ A Training button on every page: it shows that page's lessons and has search; you never have to stop work.
- ✓ The in-app guide by role and step by step, and support on WhatsApp with tickets and follow-up.

1

Sign up in a minute

Your clinic is created; you can first explore a sample clinic with trial data.

2

14 days free

No bank card. WhatsApp messages go out from our trial number, so there is nothing to set up.

3

A yearly subscription

Pay by bank transfer and register the receipt; it is switched on after approval. Your data stays where it is.

Plan (yearly)	Best for	Price per year
Basic	Solo practice · 5 users	690,000 IQD
Plus	Up to 3 dentists · 9 users	1,035,000 IQD
Oral & Maxillofacial Surgeon	Oral & maxillofacial surgery · 8 users · 50 GB for CBCT	920,000 IQD
Laboratory	Dental lab · 7 users	920,000 IQD
Large Clinic	Up to 10 dentists · 26 users	2,300,000 IQD

Prices are yearly, in Iraqi dinar. Latest prices: www.drdentaliq.com/pricing
